MyDisk Suite Installation

Requirements for Your PC Environment

If you are using Microsoft XP:

Please follow following instructions before starting to use MyDisk Suite.

(1) Make sure to update to Microsoft XP SP3.

Please use Microsoft Windows Update (<http://update.microsoft.com>)

(2) Update IMAPI to IMAPI v2.0 from Microsoft website.

The Image Mastering API (IMAPI) allows an application to stage and burn a simple audio or data image to CD-R and CD-RW devices.

(<http://www.microsoft.com/download/en/details.aspx?amp;displaylang=en&id=19622>)

(3) Update to .NET 4.0 Framework from Microsoft website.

.Net 4.0 allows our applications to use modern and current capabilities even on older systems, such as Windows XP. It is Microsoft current framework and is recommended update by Microsoft. If you update your system through Windows updates, the .NET 4.0 framework will be installed.

(<http://www.microsoft.com/download/en/details.aspx?id=17113>)

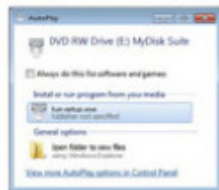

If you are using Microsoft Vista / Win7:

(1) Vista / win7 come with IMAPI v2.0.

(2) Update .NET 4.0 Framework if needed.

Please always follow Microsoft Windows updating instruction, due to not only to have your PC more stable, but also more secured.

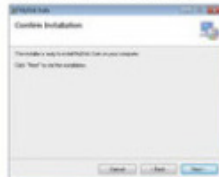

step 1 Disk AutoRun index

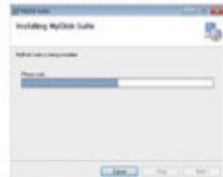

step 2 Preparing to install

step 5 'Next' to Confirm

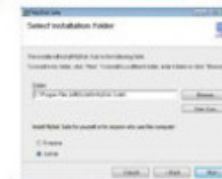

step 6 Installing MyDisk Suite...

step 3 Setup Wizard

step 4 Select Installation Folder

step 7 Installation Complete

Booklet P7,P8

Are your best photos on your iPhone and iPad device?
DiskMobile - Set your photos free!
Transfer iOS images straight to your LiteOn burner.

DiskMobile makes it easy burn images from an iOS device onto disc, use it to share images by giving other Lite-On owners the unique internet address, use it to back-up photos against theft and phone loss, use it to create an everyday record of your life and use to create files you can print from or show on a TV... With DiskMobile you can free up on-phone storage without losing the images you treasure.

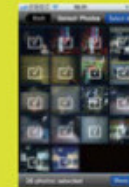

Share and burn iOS images in 5 easy steps

step 1 Open DiskMobile on your iPhone or iPad

step 2 Select the pictures you want to transfer & burn

step 3 Enter the IP address that the app gives you on your PC

step 4 The system will automatically link, now insert a blank disc

step 5 Press Start and wait a short time for disc burning to complete

Booklet P9,P10

A unique iPad application: Design attractive disc covers

that are ready to use after
being printed onto a
single sheet of paper.

Leave bland case covers behind, create and share amazing disc covers on the iPad

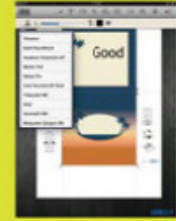

All that's needed are a few easy folds and
you've got a creative disc cover that is ready
for sharing. Design your own cover from scratch
or customize an in-built template with your favorite
photos.

Easily make own your personalized disc covers

step

1 Select a well-designed
cover template or use a
plain cover

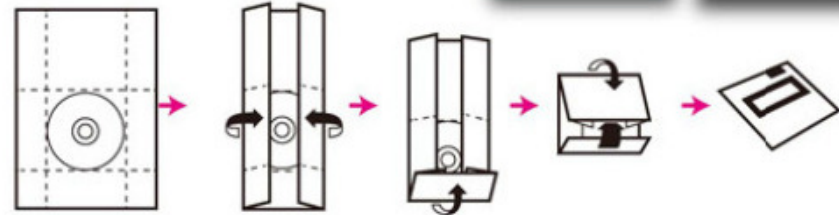

step

2 Customize the look and
add images to create your
own personal style

step

3 Print onto A4 paper,
then complete the cover
by simply folding.

Booklet P11,P12

DiskIndex burns discs with **easy-to-navigate, customized menus,** that automatically load on a PC.

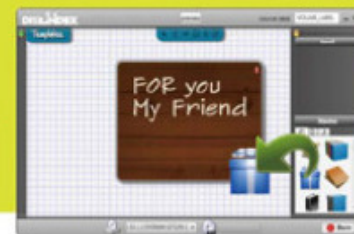

DISKINDEX

In the past when you shared files the recipient had to search through dull file lists looking for the photo, project files, or videos you wanted them to have. DiskIndex changes that; they insert your disc into their PC and your attractive custom menu appears, letting them find and view the files you want to share. The fun menus are easy to design using templates and can reflect your personality, job, or hobbies.

Easily create a disc with a DiscIndex menu

- step 1** Select one of the many professionally designed
- step 2** Choose the menu items you need by dragging icons

- step 3** Drop the files you want to burn

- step 4** Click Burn and your finished disc with menus will soon be ready!

Booklet P13,P14

DISK **COLLECTION**

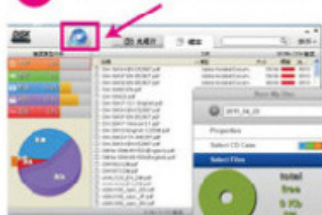

No longer
havetrouble finding
previously burned files

Make file and disc management **more efficient**

step

1 Click + new disk icon

step

2 Type a quick description of the disc and
drag-and-drop the files to be burned

step

3 Click burn

step

4 Print the disc cover,
dragging an image to the
application if you want a
picture as a cover.

DiskCollection automatically
saves the details of each disc in
its searchable index. The cover
image, description, and content
of any disc are immediately
accessible.
